

# TIMBERBITS

HELPING YOU CREATE WITH WOOD

## 7mm Fancy Click Pen

**Drill Bit:** 7 mm

**Bushings:** Slimline (A0023)

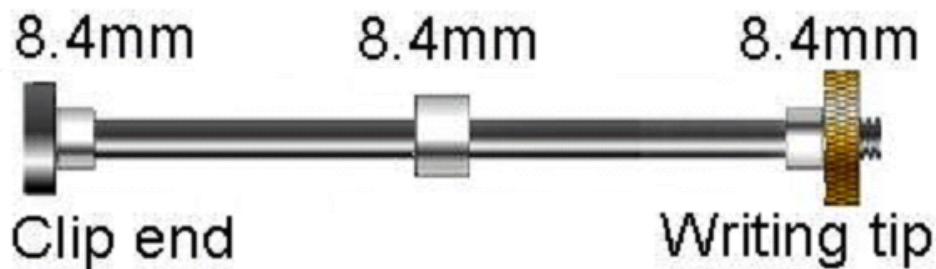

**Tube:** 7mm Brass Tubes (B005)

**Blank:** 20mm x 20mm x 130mm

**Refill:** Mini refill (T0014)

### Turning

Mount on A0023 bushings. Turn to bushing diameter, sand, and finish.

### Assembly

1. Assemble click mechanism: Insert thin shaft of smallest piece into non-threaded end of larger piece. Insert unit (threaded end first) into click mechanism from plastic end. Leave click button off until pen is assembled.
2. Upper barrel: Slide clip onto click mechanism and press into one end of upper barrel. Press tube connector into opposite end.
3. Lower barrel: Press lower barrel onto tube connector. Press in nib connector, leaving threaded portion exposed.
4. Insert refill: Slide refill spring onto refill (narrow end against black spacer). Insert refill into nib end and seat into mechanism. Screw on nib section.
5. Fit click button: Drop click spring over thread, then screw on click button. Do not press components while click button is attached.
6. Test click action. If it sticks, remove click button and gently turn internal pin or lightly twist refill to ensure alignment.
